

QuickStart: using the BLKQCL Control API

- BLKQCL is SOAP controlled. This means basically XML-formatted messages over HTTP/TCP-IP.
- The details of this communication are hidden in programming-language specific [proxies](#)
 - Off-The-Shelf-WSDL Tools ([Proxies/Proxy-Generic-Off-The-Shelf-WSDL.pdf](#))
 - C#.Net ([Proxies/Proxy-C#.net.pdf](#))
 - HTML-js (javascript) ([Proxies/Proxy-js.pdf](#))
- Find your BLK15 on the network
- See what APIs are relevant to your domain
